Republican State Committee Criticises Roosevelt Platform.

The Republican State Committee has issued a criticism of the platform of the National Progressive party adopted at the Syracuse convention. It says:

Syracuse convention. It says:

The provision which declares that "municipalities should be given power to adopt and amend their charters" in various particulars is perhaps the most remarkable proposition ever submitted by a body of individuals generally regarded as intelligent. A municipality is a corporation. A corporation is an entity which can only be created by the state. A municipality is just as much a creature of the state as a manufacturing corporation, a business corporation or a public service corporation, Any corporation derives its powers from the state, acting through its law making body. "To say that a corporation which can only exist. rives its powers from the state, acting through its law making body. To say that a corporation which can only exist by leave of the state should be given power to create itself is an absurdity. It does not exist and cannot exist until the state has created it, and when the state creates it it gives it its charter.

The city authorities should not be given unrestricted and uncontrolled power to incur obligations, fix the terms of office and compensation of officials or acquire and manage municipal properties, because in the exercise of those powers they might, and very likely would, impose serious burdens upon the citizens of the state.

cause in the exercise of those powers they might, and very likely would, impose serious burdens upon the citizens of the state not resident in such city.

There can be no free city within the limits of the state. Every citizen of the state has the right to insist that all the laws of the state be enforced within the city for his benefit, as well as for the benefit of the inhabitants of the city. To concede the wisdo of the declaration contained in the platform of the Progressive party would be equivalent to a concession that the city has the right to withdraw itself from the jurisdiction of the state.
